

## **R E M A R K S**

It has been determined that the amendments made in the specification in the paragraphs beginning on page 5, line 16 and page 9, line 14 in the amendment dated September 28, 2005 are inconsistent with the replacement sheets of drawings now of record.

In order to correct this inconsistency as well as some grammatical informalities amendatory action has been taken in these paragraphs.

Since the above amendatory action does not involve any change in the scope or substance of the application and only involves matters of form, it is respectfully submitted that entry under 37 CFR 1.312 is not only warranted but necessary in order to have correspondence between the specification and the drawings.

Accordingly, entry of the amendment after allowance is respectfully requested.

Respectfully submitted,

---
